## 1. UPFRONT (ONE-TIME) COSTS

| ITEM                                                           | COST (USD) | NOTES                                    |
|----------------------------------------------------------------|------------|------------------------------------------|
| Design & UX (wireframes, UI, branding/logo)                    | \$2,500    | Freelance designer, ~25 hrs at \$100/hr* |
| Front-end dev in Bolt (Pro subscription, build phase)          | \$600      | 3 months Bolt Pro at \$200/mo*           |
| Developer/contractor time (refine & test generated code)       | \$4,000    | 80 hrs at \$50/hr*                       |
| Back-end setup in Supabase (schema, auth, RLS, edge functions) | \$2,000    | 40 hrs at \$50/hr*                       |
| Integration, testing & QA                                      | \$1,500    | 30 hrs at \$50/hr*                       |
| Apple Developer Program                                        | \$99       | Annual fee                               |
| Google Play Developer                                          | \$25       | One-time fee                             |
| Domain registration                                            | \$15       | Annual, .com domain*                     |
| Business registration / LLC                                    | \$150      | State filing fee*                        |
| Trademark filing                                               | \$350      | USPTO TEAS Plus*                         |
| Legal (ToS, privacy policy, contracts)                         | \$1,200    | Flat-fee attorney package*               |
| Initial marketing assets & launch materials                    | \$1,000    | Brand kit, screenshots, demo video*      |
| Subtotal                                                       | \$13,439   |                                          |

## 2. COST PER USER (VARIABLE / RECURRING)

| ITEM                                                | COST (USD) | NOTES                                |
|-----------------------------------------------------|------------|--------------------------------------|
| Supabase Pro plan                                   | \$300      | \$25/mo × 12 months*                 |
| Supabase overage (DB size, storage, bandwidth, MAU) | \$240      | Est. \$20/mo overage*                |
| Bolt hosting / deployment (front end + bandwidth)   | \$240      | Est. \$20/mo for production hosting* |
| Third-party APIs (Stripe ~2.9% + \$0.30 per tx)     | \$580      | Est. 500 transactions/yr*            |
| Push notifications (FCM/APNs)                       | \$0        | Free tiers cover Year 1 volume*      |
| Email/SMS (transactional)                           | \$120      | SendGrid/Twilio low-volume tier*     |
| Customer support tooling                            | \$180      | Crisp/Intercom starter plan*         |
| Data backup & security (PITR add-on)                | \$300      | Supabase PITR ~\$25/mo*              |
| Analytics & monitoring (Sentry, PostHog)            | \$0        | Free tiers sufficient for Year 1*    |
| Subtotal                                            | \$1,960    |                                      |

3. MARKETING & ADVERTISING

| ITEM                                                  | COST (USD) | NOTES                                        |
|-------------------------------------------------------|------------|----------------------------------------------|
| Pomelli (Google Labs AI marketing tool)               | \$0        | Currently free; \$0 line item                |
| Pomelli future paid tier (placeholder)                | \$0        | Reserved — est. \$50–\$200/mo if priced*     |
| Supplemental creative production (VO, music, editing) | \$800      | Stock audio + freelance editor*              |
| Paid ad spend — X (Twitter)                           | \$500      | Est. \$2.50 CPC, 8-week campaign*            |
| Paid ad spend — Facebook / Instagram                  | \$800      | Est. \$1.80 CPC, 8-week campaign*            |
| Paid ad spend — TikTok                                | \$600      | Est. \$1.00 CPC, 8-week campaign*            |
| Paid ad spend — YouTube                               | \$700      | Est. \$5 CPM, 8-week campaign*               |
| Social media management & scheduling tools            | \$240      | Buffer/Later pro plan, 12 mo*                |
| Influencer / partnership outreach                     | \$1,000    | Micro-influencer stipends*                   |
| Launch event / PR costs                               | \$500      | Virtual launch + press release distribution* |
| Subtotal                                              | \$5,140    |                                              |

4. ONGOING OPERATIONAL COSTS (ANNUAL)

| ITEM                                                   | COST (USD) | NOTES                             |
|--------------------------------------------------------|------------|-----------------------------------|
| Bolt subscription (maintenance, updates, new features) | \$2,400    | \$200/mo Pro plan*                |
| Supabase plan + add-ons (compute, storage, backups)    | \$600      | Pro \$25/mo + add-ons*            |
| Maintenance & updates (bug fixes, OS compat, features) | \$3,000    | 60 hrs at \$50/hr*                |
| Other software licenses & dev tools                    | \$360      | GitHub, design tools, misc.*      |
| Accounting, bookkeeping & tax preparation              | \$900      | QuickBooks + seasonal bookkeeper* |
| Business insurance (general + cyber liability)         | \$600      | Est. \$50/mo for small startup*   |
| Bank fees & payment-processor monthly fees             | \$180      | Est. \$15/mo overhead*            |
| Founder / solo developer salary                        | \$12,000   | Minimal draw, \$1,000/mo*         |
| Subtotal                                               | \$20,040   |                                   |

5. CONTINGENCY

|                                                                                                                                                                                                                                                        |                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Contingency Reserve (12% of \$40,579)</b>                                                                                                                                                                                                           | <b>\$4,869</b> |
| A 12% contingency is included to absorb unexpected costs — API pricing changes, additional QA cycles, store review delays, or unanticipated infrastructure overages. Industry standard for software projects is 10–15%; we use 12% as a middle ground. |                |

KEY ASSUMPTIONS

Year-one target of 5,000 users; pricing at \$4.99/month subscription.  
Bolt Pro plan at \$200/month covers build phase and ongoing hosting.  
Supabase Pro plan (\$25/mo) sufficient until ~50K MAU; overage estimated conservatively.  
Pomelli is free during Google Labs; a paid-tier placeholder is reserved but not budgeted.  
All labor rates assume US-based freelancers/contractors at \$50–\$100/hr; no full-time hires in Year 1.

**Total capital required: \$45,448** to build, launch, and operate ShoeBox through Year 1 at a \$4.99/month subscription model.

Break-even: 759 paying users per month (\$3,787/mo in revenue) covers the monthly burn rate of \$3,787.

\* Estimated using industry-standard benchmarks for a small startup app. Actual costs may vary based on contractor rates, user growth trajectory, API usage, and platform fee changes.
